Travel Healthy

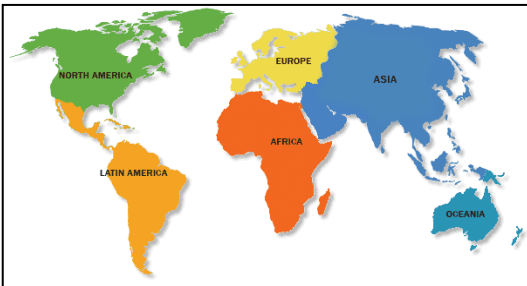

Less than 40% of International Travelers are protected against potentially life-threatening diseases like hepatitis and malaria. Are you protected?

Why are you traveling?

- Vacation
- Business trip
- Study abroad
- Visit with friends or relatives
- Cruise
- Missionary or relief work
- Adventure

Where are you traveling?

- Africa
- Asia
- Eastern Europe
- South America
- Central America

Travel Smart

Travel to Asia, Africa, Eastern Europe, Central and South America potentially exposes traveler to preventable, but deadly, diseases. Risks vary depending on the activities and length of stay.

To learn more, schedule a pre-travel consultation with a Travel Clinics of America physician:

- Ideally, 4-6 weeks before your departure or,
- As soon as you plan your international trip

During a visit, your Travel Clinics of America physician will:

- Review ***your*** health history
- Review ***your*** immunization history
- Discuss health concerns for ***your*** planned destinations
- Prescribe medications specific to ***your*** health ***and your*** itinerary
- Offer and administer immunizations
- Issue the International Certificate of Vaccination (Yellow Card)
